SKILLS & EXPERIENCE

Eventide Audio, Inc.

Senior Software Engineer

November 2022 - Present

Little Ferry, NJ (Remote from Los Angeles, CA)

- Led multiple audio software projects, driving innovation in real-time audio processing.
- Implemented Agile practices to improve development workflow and team efficiency.
- Enhanced overall team coding skill level through thorough code reviews and mentorship.
- Applied deep expertise in concurrency to solve complex real-time audio processing challenges.
- Designed and deployed a full continuous integration pipeline for macOS, iOS, and Windows, supporting 40 audio software applications across all formats, including automated testing and nightly build systems to ensure software stability and reliability.

Output, Inc.

Audio Software Engineer

September 2015 - August 2022

Los Angeles, CA

- Founding software engineer, growing the team from a single developer to multiple engineers and projects.
- Led development of core audio applications, including award-winning software such as Arcade and Movement.
- Designed and implemented synthesis engine architecture, signal processing architecture, and internal frameworks.
- Developed unit testing and end-to-end testing tools to improve build stability.
- Created and led "Output Teaches Audio Plugins with C++ and JUCE," an initiative to educate developers on best practices in audio plugin development.
